November 2005 Sexually Transmitted Infections (STIs)

Sexually Transmitted Infections (STIs) is this year's infectious disease month (November) topic. Over 68 million Americans are living with a STI and each year, about 15 million new cases occur. In the 1960's, only two STIs were known; today, there are at least twenty-five known STIs. With so many new STIs and more Americans becoming infected throughout all age groups, it is important to recognize and know the recent facts about STIs.

Hardcopies of the packet will be available at all medical and fitness facilities. If you or your department/organization would like to be added to the monthly packet hardcopy distribution list, please call Kris Calderon at 867-3414. The packet is also available on the new HEWP website: <http://hewp.ksc.nasa.gov>
